Direct GO Count (MF) [blast_result]

#Seqs

protein binding
DNA binding
RNA binding
metal ion binding
identical protein binding
protein homodimerization activity
RNA polymerase II proximal promoter sequen...
DNA-binding transcription activat...
nucleic acid binding
endonuclease activity
RNA-directed DNA polymerase activity
zinc ion binding
ubiquitin protein ligase binding
structural molecule activity
structural constituent of ribosome
protein heterodimerization activity
chromatin binding
cytokine receptor activity
transcription factor binding
actin filament binding
GTPase activity
unfolded protein binding
cholesterol delta-isomerase activity
single-stranded RNA binding
catalytic activity
actin binding
ligase activity
DNA-binding transcription factor activity
protein kinase activity
enzyme binding
mRNA binding
protein C-terminus binding
nucleoside binding
protein domain specific binding
protein transporter activity
double-stranded RNA binding
translation initiation factor activity
tRNA-intron endonuclease activity
type II site-specific deoxyribonuclease...
copper ion binding
ATP-dependent RNA helicase activity
others
